Front-End Developer

+3 years of experience with IT, I started as a full stack developer where I worked with ReactJs and Node, technologies that I love and seek to specialize in until today. I currently work at Ericsson Inovação S.A, creating and running tests on projects for our client, VIVO - Telefônica, one of the largest telephone companies in Brazil, that impacts the lives of more than 90 million people. Passionate about technology and knowledge, my mission is to turn ideas into reality always with the best quality as possible.

Main Skills

- ReactJs
- TypeScript
- NodeJs
- User Experience (UX)
- Styled Components
- Rest API
- NextJs
- Git

Work experience

- **Ericsson Inovação S.A** 05-2021 - Present
QA - Software Analyst
Creation and execution of manual and automated tests collecting evidence in OracleSQL database and linux servers with remote connections, as well as management of laboratory defects and approval of projects for VIVO - Telefônica, one of the largest telephone companies in Brazil.
 - Execution of tests in API Client: Postman, SoapUI and Jmeter;
 - Laboratory and Homologation defects management: HP ALM (Quality Center/Jira);
 - Customer support (Telefônica | VIVO) in tests in an homologation environment;
 - Version Control Tool: SVN.
- **Parallel Consulting & Training** 09-2020 - 04-2021
Full Stack Developer
Maintenance and development of features in a sales platform for courses using React, NodeJs and MySql.
 - Knowledge in Web Host management with CPANEL;
 - Agile methodologies with Scrum and Kanban;
 - Knowledge advanced in Git for version control.

Education

- Universidade Católica do Salvador - Analysis and systems development – Present.
